

# AEM Forms Administration

**Description:** Adobe AEM Forms is a robust and complex set of enterprise form technologies and tools. Unfortunately, AEM Forms can be as confusing as it is comprehensive. Until now. This unique and innovative course covers both the *OSGI* and the *JEE* stack of AEM Form technologies. You will work hands-on with all of the important Adobe AEM Forms tools. The course includes lectures and demonstrations of each topic followed by hands-on exercises. Students will master Adobe's AEM Forms technology and tools in this intensive course.

**Target audience:** IT/Systems Admins, Developers, Business Leaders, and Technical Support Staff who work with AEM Forms Servers (versions 6.0, 6.1, 6.2, and 6.3).

## Agenda: Day 1
