

Develop Adobe Experience Manager v6.x Forms

Course description: Develop Adobe Experience Manager v6.x Forms (formerly offered as *AEM Forms for AEM Developer* and *AEM Forms for JEE Forms Developer*) is a two-day, instructor-led in a classroom or virtual course, where you will learn to configure and develop Adaptive Forms and Document functionality. This course will cover configuration topics for a developer including the prefill service, form templates, document services, client libraries, mobile form features, creating a document of record (XDP File), and building a mobile solution. Participants will configure form data and document of record, and learn best practices for developers.

Target audience: This course is designed for Forms developers, application developers, and IT Support.

Prerequisites

It is recommended you have knowledge about Content Management or Document Management systems, some experience with web page design or document management, Java coding and web development experience, and an understanding of HTML, JavaScript, XML, and the ExtJS Framework.

Objectives

After completing this course, you should be able to:

- Use AEM Forms Designer to configure form behavior, form data, and the AEM Form OSGi technology
- Describe the "service"-oriented nature of AEM Forms
- Configure and manage the back-end data behavior and processes when a form is submitted
- Configure a form's model in XML
- Use JavaScript to add functionality
- Pre-populate forms using the Prefill service
- Use Instance Manager to make a User Driven Dynamic Form
- Generate a Multi Record PDF using Output and Watch Folder
- Add functionality to Adaptive Forms using Client Libraries
- Create and Configure a Document of Record (XDP)
- Build a mobile solution

Course materials

- Develop Adobe Experience Manager v6.x Forms Student Workbook with hands-on exercises

Topics

- Introduction to AEM Forms
- AEM Forms Development with Forms Designer
- Prefill Service
- Configuring Templates
- Configuring Document Services
- Client Libraries
- Creating a Document of Record
- Building a Mobile Solution
