

Adobe Experience Manager

AEM Forms Administration

Course description: AEM Forms Administration is a 3-day, instructor-led course where you will learn to configure, manage, and maintain an AEM Forms Server. It can be taught live, in a classroom, or as a virtual course. AEM Forms on JEE is a robust and complex set of enterprise form technologies and tools. It includes Adobe's Legacy LiveCycle products along with their latest and greatest AEM technology and tools. Understanding how these technologies work together is critical for your success. You will learn all of the Administration tools including the Felix Web Console, CRXDE, AdminUI, and the various administration consoles in AEM's Touch UI and Classic interfaces. You will learn how to install, configure, manage, maintain, and harden and AEM Forms on JEE Server. You will learn how to create and manage workflows with the AEM JEE and OSGI workflow tools.

Prerequisites: None

Target audience: This course is intended for AEM Forms Administrators

Objectives

After completing this course, you will be able to:

- Understand AEM Forms on JEE and AEM Forms on OSGI
- Understand Best Practices for AEM Form Publishing
- Install AEM Forms on the JEE and OSGI platforms
- Run Configuration Manager to configure PDF Generate, the SharePoint Connector, Document Security, and other modules
- Create and encrypt JDBC data sources
- Create and Install Packages and AEM Forms Archives
- Integrate AEM with LDAP Users and Groups
- Create Roles and Permissions
- Create JEE and OSGI workflows
- Create and manage Author and Publish instances
- Configure Dispatcher and Caching on web servers
- Create and manage Replication Agents
- Understand and work with Log Files
- Harden your AEM Server's Security
- Run the security checks
- Manage application and system configurations
- Run AEM Health Reports
- Perform Backup Tasks

Course Materials

- 100 page *AEM Forms Administration* Student Manual

TOPICS

- Configuration
 - > The JEE technology
 - > The OSGI technology
 - > Hardening
 - > SSL
 - > Running as a service
 - > Creating JDBC data sources
- Administration
 - > AdminUI
 - > Felix Web Console
 - > Classic Mode Administration
 - > Touch UI Administration
- Users & Groups
 - > LDAP integration
 - > Roles & Permissions
 - > Groups & ACLs
- Managing Workflows
 - > JEE workflows
 - > OSGI workflows
- Publishing
 - > Author instances
 - > Publish Instances
 - > Web Server Integration
 - > Dispatcher Configuration
 - > Replication Agents
