AEM Forms Administration

Course description: AEM Forms Administration is a 3-day, instructor-led course where you will learn to install, configure, and maintain an AEM Forms Server. It can be taught live, in a classroom, or as a virtual course. AEM Forms on JEE is a robust and complex set of enterprise form technologies and tools. Understanding how these technologies work together is critical for your success. You will learn all of the Administration tools including the Felix Web Console, CRXDE, AdminUI, and the various administration consoles in AEM's Touch UI and Classic interfaces. You will learn how to install, configure, manage, maintain, and harden an AEM Forms on JEE Server. You will learn how to integrate your AEM Forms Server with your enterprise applications like databases, Mail Servers, and LDAP systems. You will learn how to create and manage workflows with the AEM JEE and OSGi workflow tools.

Prerequisites: There are no prerequisites for this course.

Target: IT/Systems Administrators, Developers, Business Leaders, and Technical Support Staff who work with AEM Forms Servers.

Objectives

After completing this course, you will be able to:

- Install and Configure an AEM Forms on JEE Server
- Install and Configure an AEM Forms on OSGi Server
