AEM Forms as a Cloud Service

Course description: *AEM Forms as a Cloud Service* is a cloud-native, Platform as a Service (PaaS) solution for organizations to create, manage, publish, and update digital forms. It runs on the *Microsoft Azure* cloud system, so you don't need to provision servers and install software. According to Adobe the service is, "*always current, always available, and always learning.*" And, unlike an on-prem server, the cloud service includes a Content Delivery Network (CDN) to push assets closer to the end-user.

In this 1-day, instructor-led course, we will work hands-on with AEM Forms as a Cloud Service. We will create adaptive and responsive forms and learn about the new features in AEM Forms as a Cloud Service. We will create SOAP (*Simple Object Access Protocol*) and REST (*Representational State Transfer*) data sources and integrate our forms with data through Form Data Models. We will also use other cloud services like Google's reCAPTCHA (*Completely Automated Public Turing test to tell Computers and Humans Apart*) service and Adobe Sign.

Prerequisites: None, but knowledge of AEM is helpful.

Objectives:

After completing this course, you will be able to:

- Understand the differences between the cloud offering and an on-prem server.
- Create Adobe IMS users and groups.
- Assign products and permissions to the users and groups.
- Install Reference Templates and Themes.
- Create Adaptive Forms with *AEM Forms as a Cloud Service*.
- Create SOAP (*Simple Object Access Protocol*) data sources.
- Create REST (*Representational State Transfer*) data sources.
- Create SOAP and REST *Form Data Models*.
- Create an adaptive form that integrates with a relational database.
- Create an adaptive form that uses the get, update, and insert services of a *Form Data Model*.
- Integrate adaptive forms with Adobe Sign.
- Integrate adaptive forms with CAPTCHA services.
- Add multilingual capabilities to an adaptive form.

Course Materials

- *AEM Forms as a Cloud Service* Student Manual

AUDIENCE

- Form Authors, Designers, Business Professionals, Developers, and Technical Support Staff who need to master AEM Forms as a Cloud Service.

PRODUCT VERSIONS

- AEM Forms as a Cloud Service is kept current by Adobe, so we are always using the current version.

LENGTH

- 1 day
