

Adobe Experience Manager

AEM Forms Workbench

Description

AEM Forms Workbench is a 2 or 3 day, instructor-led course that can be taught in-person or virtually over Adobe Connect. You will learn to use AEM Workbench to design and develop AEM Forms JEE applications. If you wish to develop sophisticated AEM Forms applications with custom components, the additional third day option is required.

Each section begins with an activity to introduce you to the topic. Our Adobe-Certified Instructor will then teach the topic with a combination of lectures and demonstrations. Each topic will be enforced with an exercise where you can put into practice the functionality covered in the lesson. The exercise will build on each other so you will have a complete AEM Forms Workbench application when you are done.

Course Materials

AEM Forms Workbench 100 page Student Manual

Audience

Designers, Developers, Form Authors, Business Professionals, and Technical Support Staff who need to develop AEM Forms applications with Workbench.

Product Versions

AEM Forms Workbench 6.0, 6.1, 6.2, 6.3 and LiveCycle Workbench

Length

2 or 3 Days

Course Outline

Introduction to Workbench

Hands-on Activity: Importing an AEM Forms archive
Lecture and Demo
Hands-on Exercise: Reviewing a Workbench application

Building a Workflow Process in Workbench

Hands-on Activity: Designing your process
Lecture and Demo
Hands-on Exercise: Creating a Workbench process and application

Testing a Workflow Process in Workbench

Hands-on Activity: Instantiating and Recording
Lecture and Demo
Hands-on Exercise: Testing and trouble-shooting your application

Adding Document Services

Hands-on Activity: Using the PDF Output service
Lecture and Demo
Hands-on Exercise: Adding other form and document services

Adding User Services and Process Management

Hands-on Activity: Reviewing the user service
Lecture and Demo
Hands-on Exercise: Adding other user and process management services

Events

Hands-on Activity: Reviewing events
Lecture and Demo
Hands-on Exercise: Responding to events in your Workbench application

Parallel Processes with the Gateway Element

Hands-on Activity: Parallel vs. Sequential workflow
Lecture and Demo
Hands-on Exercise: Creating a parallel workflow

Parallel Processes with Multiple Users

Hands-on Activity: Creating a User List
Lecture and Demo
Hands-on Exercise: Assigning tasks to multiple users

Database Integration

Hands-on Activity: Overview of JDBC
Lecture and Demo
Hands-on Exercise: Programming a database-driven workflow

Custom Components

Hands-on Activity: Deploying Custom Components
Lecture and Demo
Hands-on Exercise: Creating custom components in Java
