

# Adobe Experience Manager

## AEM Forms Workflow

**Course description:** Workflow has always been an important part of Adobe AEM Forms. Previously, the best workflow tools and capabilities were on the AEM Forms JEE platform. This platform (JEE) features the Workbench tool and many out-of-the-box AEM Forms workflow steps. However, as of AEM 6.5, the workflow tools and capabilities in AEM Forms OSGi now match the capabilities of AEM Forms JEE. This course covers the new workflow tools and capabilities of AEM Forms OSGi.

AEM Forms Workflow is an instructor-led classroom or virtual course where you will learn to use AEM Forms OSGi workflow to automate your forms and business processes. You will learn important AEM Forms workflow concepts and perform many hands-on exercises to build workflow solutions. The course covers design and runtime models, process variables, and an important *out-of-the-box* workflow steps. In addition to design and development, you will also learn how to monitor and trouble-shoot workflows with the built-in AEM tools.

**Prerequisites:** AEM Forms Developer or similar experience

### AUDIENCE

- Developers who need to create workflows with AEM Forms OSGi.

### PRODUCT VERSIONS

- AEM Forms OSGi 6.5+

### LENGTH

- 1 day

### Objectives:

After completing this course, you will be able to:

- Automate repetitive and recurring forms processes with workflow.
- Create and sync a workflow model.
- Create a *Forms Review* workflow.
- Create a *Process Form Submission* workflow.
- Use the *out-of-the-box* Document Services in a workflow.
- Create a Watched Folder endpoint for your workflow.
- Integrate with Adobe Sign workflow.
- Generate PDFs based on variable data.
- Assemble PDFs with DDX (*Dynamic Document XML*).
- Encrypt PDFs with the Secure Document workflow step.
- Add conditional logic with the Expression Editor.
- Add conditional logic with ECMA Script.
- Use the OR Split in a workflow.
- Monitor and trouble-shoot workflows with the built-in tools.
- Create a custom workflow step.
- Use a custom workflow step in a workflow.
