

Adobe Experience Manager

AEM Forms Document Security

Description

Master the Adobe Document Security tools and techniques. The course includes theory about Adobe Digital Rights Management followed by hands-on exercises. Participants will learn how to work with and develop policies, rights-managed documents and workflows. Students will learn the fundamentals of Adobe DRM and also create sophisticated server applications that apply policies and encryption and also applications that revoke security and retire documents. Advanced users will learn how to integrate Adobe DRM with other enterprise systems.

In addition to providing you with theory about Adobe DRM, a large segment of the training is devoted to hands-on exercises as well as demonstrations. For each lesson, we will start with an activity to introduce you to some of the concepts that will be covered in the lesson. We will then cover the content of the lessons using a combination of lectures and demonstrations. We will finish off each lesson with an exercise where you can put into practice the topics covered in the lesson.

Course Materials

AEM Document Security 75 page Student Manual

Audience

IT/Systems Administrators, Developers, Business Professionals, and Technical Support Staff who work with AEM Forms Document Security (a.k.a Adobe Digital Rights Management)

Product Versions

AEM Forms 6.0, 6.1, 6.2, 6.3 and LiveCycle Rights Management

Length

2 Days

Course Outline

Configuring Document Security

Configuring SSL and Rights Management on your server
Configuring Acrobat and Microsoft Office applications for DRM
Configuring the Intro Policy Set and Policy

Introduction to Digital Rights Management

Viewing a Rights-Managed File
Discussing Use Cases

Introduction to Adobe Application Development

Reviewing an Application
Developing an Application

Introduction to Adobe Server Administration

Reviewing the Administration Console
Creating a Watched Folder

Watermarks and Messages

Creating a Dynamic Watermark
Dynamic Watermarks and Messages

Policy Sets and Policies

Creating a Policy Set
Creating a Policy
Enabling Policies

Applying Policies server-side

DRM operations and services
Creating an application
Testing your application

Applying Policies with Acrobat

Applying a Policy with Acrobat
Revoking a Document

External Authorization Handlers

Creating External Authorization Handlers
Installing and Deploying Custom Components

Digital Signatures and Certified PDFs

Signing and Certifying a PDF document
Analyzing Signature Status
